FIRE PROOF OIL.

InsurancE AGAINST COAL-OIL ACCIDENTS Outside of a lamp, and with nothing to act as a wick. "Fire-proof Oil" will no ignite if burning torches are dippedinto it is the hottest weather. But in a lamp and with a wick, it burns with surpassing brilliancy

This explains our trade mark, "Fire Proc Oil." If the cook pours this oil into the stove, or the children knock over a lamp fill ed with it, there will be no explosion. It is made from a crude oil that comes from the ground free from the inflamable quality of other petroleum. This remarkable crude is pumped from our "Kinslow Well" in Barren county, Ky., a well which has not its counterpart, as far as we know, in the world; Dur-ing the past few years, we have refined an distributed thousands of barrels of this of and there has never been an accident fro its use, or from its misuse. Fireproof is eco-nomical, because it lasts enough longer than common "coal oil" to balance the first differce in cost. It will burn brilliantly in any od of a lamp, without odor or smoke.
